

AI ENGINEER RESUME

B.Tech Artificial Intelligence | Lords Institute of Engineering and Technology

CAREER OBJECTIVE

Aspiring AI Engineer with hands-on experience in Python, PyTorch, Deep Learning, NLP, Generative AI, RAG, LangChain, LangGraph, and LLM applications. Interested in building practical AI systems and intelligent applications.

TECHNICAL SKILLS

Programming: Python

Data: NumPy, Pandas

Deep Learning: PyTorch, Neural Networks, CNN, RNN, LSTM, GRU, Transformers

NLP: Tokenization, Embeddings, Attention, Text Classification

Generative AI: LLMs, Prompting, Fine-tuning, RAG, Embeddings, Vector Databases, Agents

AI Frameworks: LangChain, LangGraph, Hugging Face

Vector Search: FAISS, Sentence Transformers

PROJECTS

AI Interview Preparation Assistant

Built an AI-powered interview preparation application using Streamlit, LangChain, Hugging Face, Qwen, FAISS, and Sentence Transformers. Features include resume analysis, skill-gap analysis, RAG-based document assistance, mock interviews, answer evaluation, scoring, and downloadable interview reports.

Customer Support AI Assistant

Developed a customer-support text classification assistant using DistilBERT and LoRA fine-tuning across multiple support categories, with chatbot-style interaction and conversation history.

AI Research Assistant

Built a PDF question-answering system using Sentence Transformers, FAISS, CrossEncoder reranking, FLAN-T5, source-page retrieval, query rewriting, and conversation memory.

EDUCATION

B.Tech in Artificial Intelligence

Lords Institute of Engineering and Technology

KEY AREAS

Artificial Intelligence • Deep Learning • NLP • Generative AI • LLM Applications • RAG • Fine-tuning • AI Agents • LangChain
